Bringing up the baby is now a science and fine art! Most of the maternal grandparents would agree with this statement. My mother lost fifteen kilos in six months when my son was born and I gained that as much. Both ways it was because of the anxiety and shared responsibility. My colleagues welcome retirement when their daughter is ready to deliver or had just delivered. They most often befriend young experienced mothers and spend long counselling sessions with them collecting tips on how to tackle a crisis.

It is a funny sight to see grey haired women browse "Bringing up Baby" books at the local book store. One tends to think what they did with their own off springs. Ask them and pat comes the reply "it was so easy then. They grew up on their own." The mother may wear many hats at the same time. But to her or her parents. The mind boggling thing for the first few years is diaper changes, circadian rhythm and continual feeding. At home social life is taboo. Phone calls give cause for irritation, music becomes noise, friends and relatives become total strangers, the domestic help a spirit or mercy and the pediatrician a fairy god mother. Raising a kid is akin to a guerilla warfare and if you hear a woman say that her baby 'is beautiful and perfect and an angel all the time' then she is the grandma.

172. What is difficult for maternal grandparents?
a) Raising grandchildren
b) Feeding children
c) Giving birth to grandchildren
