Newspapers hold up-to-date information about politics, economics, sports, entertainment, crime, business and society. There are several advantages that newspapers have over other media of information and entertainment. They are a reliable and cheap source of information. As the cost of newspapers is negligible, they can be bought even by those who are not well-to-do. Another advantage of newspapers is that they can be read even if one is on the go. It does not require any special effort to carry a newspaper when one is travelling by bus or train. The extreme portability of newspapers makes them a popular and convenient source of information.
